-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 22 May 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/22/2006 has been entered.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 39, 43 and 48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 39, this claim is found to be vague and indefinite because it is unclear as to what further structural limitation is being set forth. The reference to "the vessel" in the body of the claim is improper because it is an attempt to define the invention by itself, when only claimed structural elements should be used as such. Clarification is required.

With respect to claim 43, "the first accommodating section" lacks proper antecedent basis.

With respect to claim 48, this claim is found to be vague and indefinite because it is unclear as to what actual structural limitations are being set forth. Clarification is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 35-49 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Biermaier U.S. patent No. 5,288,467.

Biermaier teaches means for sterilizing endoscopes including tray means for receipt of a portion of the endoscope formed with a cylindrical protective section to receive the flexible insertion portion of the endoscope and a protective containment section (43) for the operating head thereof which functions as a lid means for the section receiving the flexible portion of the endoscope. The transition between the two sections is cylindrical and flexible for the passage of the flexible portion of the endoscope therethrough. The entire housing is also closed with lid means. See particularly Fig. 1 and column 4.

Claims 35-49 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wassenburg EPO 271,157.

Wassenburg teaches means to contain and sterilize an endoscope wherein tubular vessel means are provided to accommodate the flexible portion of the

endoscope, and a separate detachable section is provided for containing the operating head of the scope with means therein to support the head. The transition between the two sections is provided with a flexible, cylindrical o-ring means. The section containing the head is configured as a lid closing the section supporting the flexible portion and a second lid means is provided closing the entire container. See particularly Figs 3-6 and column 8, line 42 through column 9, line 30.

### ***Response to Arguments***

Applicant's arguments with respect to claims 35-49 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Krisanne Jastrzab whose telephone number is 571-272-1279. The examiner can normally be reached on Mon.-Thurs. 6:00am-4:30pm.
